

# *WIA – The Project*

---

**1) A detailed description of where each of the criteria is on your site. Anything not listed here may not be counted.**

The homepage is under “index.html” and it is the first page you will see. Once inside the homepage, you will see a navigational bar to your left. This navigational bar will guide you through out the entire website. The very first list item you will see is titled “Our Statistics.” This is where the Animated Bar Chart is located. Once inside, you will see an option at the bottom to “go back.” This will take you back to the homepage. Once you have returned, go to the second list item. It is titled “Delivery Options.” Click on that and you will see the Interactive Map located here. Go back once again and the third list item you will see is “The Gallery” and once clicked, you will be welcomed with a page containing three images to browse. Not only does it host images, but it also contains the Interactive Image Gallery as well. Go back once again and the fourth list item is titled “Theatre Zone.” This is where audio/media is stored. It also uses the HTML5 Audio tag. Go back once more and click on the fifth list item. This list item is titled “Supply Status” and it contains three uses of jQuery effects all contained within one image. Go back and lastly, you will see the sixth list item, which is titled “Modernizr Test.” Once clicked, you will see a verification message that will show that Modernizr has been setup and is used properly.

## **2) An overview of why you chose the theme & Idea for your site.**

Sharpe's Supplies is a made-up company that I created while attending Full Sail. I prefer to create my own companies rather than citing one that is well known. The theme that I chose for my website was meant to have an elegant vibe. Although Sharpe's Supplies is a company that promotes office supplies, I gathered the idea for the theme from a jewelry website that I once visited awhile back. I can't remember the name exactly, but I do remember that it had a similar dark theme and the link items had a diamond-like styling, similar to that of mine, next to them. So why did I choose to make this website about "office supplies" rather than jewelry or anything else for that matter? I actually have a collection of office supplies at my home. For some reason office supplies have always appealed to me. As strange as it may be, I find it fascinating and if I ever did have a company or business it would most likely revolve around office supplies.

## **3) Links to any graphics that you used online with releases that says you can use them**

All of the images that I have used excluding the image "marker.png", come from this website called "Pixabay.com." They host images that are free for anyone to use. Here is the link to their terms where they verify this statement:

Link: <https://pixabay.com/en/service/terms/>

Pixabay images are released under Creative Commons (CC0). Here is the link that was posted inside of the terms section where it clearly states that users may use images without permission:

Link:

<https://creativecommons.org/publicdomain/zero/1.0/deed.en>

The audio that was used for my project came from the website “mediaelementjs.com.”
